- At a meeting of the directors of the VVB Hochseeschiffbau on 23 July 1951, it was stated that 200 tons of boiler tubes required for the S.S. SOVETSKI SOYUZ are to be delivered by F.A. Frohn und Sohn, Rehscheid.* The export license for these tubes had not yet been received at that time. The VVB was to have some information on the matter within [redacted] time.
- It was further stated that some of the tubes for the S.S. YAKUTIA were ready, and that tubes for the S.S. POBEDA were to be ready in July and August from Riesa.** Word was received from HV Schiffbau (Main Department for Shipbuilding), DDR Ministry of Machine Construction, that Riesa** could make boiler tubes of other dimensions in excess of the program.
- Prospects for the importation of boiler tubes from the USSR were said to be ambiguous. The Russians apparently did not appreciate the importance of this matter, and the supply of tubes was not yet adequate. Col. Gromov had been informed of the situation in writing. The VVB intended to make a strong appeal to the USSR, as all their other sources had so far failed.
